CAREER SUMMARY

DevOps Engineer with 2+ years of experience in CI/CD automation, cloud infrastructure, containerization, and server management. Skilled in GitHub Actions, Jenkins, Docker, Kubernetes, and Terraform with strong experience in AWS services.

KEY COMPETENCIES

- **AWS Services** - EC2, S3, IAM, VPC, RDS, Beanstalk, CodePipeline, Code Build, ECR, Cloudwatch, EKS
- **GCP Cloud** - VPC, VM, IAM, gcloud, cloud storage, GKE, Firewall, Artifact Registry, Load Balancer and Auto-scaling.
- **Infrastructure as Code** - Terraform, Ansible(Basics)
- **CI/CD Pipelines** - GitHub Actions, Jenkins, AWS code pipeline
- **Containerization & Orchestration** - Docker, Kubernetes, Helm, ArgoCD
- **Programming & Scripting** - Shell Scripting, Python(Basics), Groovy
- **Web & SEO Tools** - Cloudflare, Google Search Console, SEO Optimization, Google Analytics
- **Other Tools** - Git, GitHub, VS Code, Github Desktop
- **AI Tools** - Anthropic Claude, Gemini, Perplexity, Cursor, LLM,
- **AI Skills** - MCP server, Vector Data, RAG, Skill-set, OpenClaw, Agentic AI, GenAI, Prompt Engineering

WORK EXPERIENCE

Crypto 306

DevOps Engineer |

04 June, 2024 - Present

Project 1 - News Articles Website Hosting

- Designed and automated **CI/CD** pipeline with **GitHub Actions** for deploying a News Articles Website on AWS EC2.
- Integrated GitHub with automated build-test-deploy workflows, reducing manual release efforts by 80%.
- Configured GitHub **Secrets** and **IAM** roles for secure deployments, ensuring compliance and access control.
- Applied **SEO** optimization techniques and integrated **Cloudflare** for domain management, performance, **Content writing**, and **WAF** security.

Project 2 - AWS - Data Governance tool

- CI/CD implementation using GitHub, AWS CodeBuild, **CodePipeline**, and EC2 for efficient software delivery and streamlined development workflows across **multiple environments**.
- Worked with Docker including **Dockerfile**, used ECR to store docker images with tag and Docker-Compose to create **Containers** with their environment variables and in same network.
- Deployed respected docker images on EC2 on multiple ENVs.

Project3 - GCP - SocialApplication

- Worked on Java based **social media app** which get build and deployed using GitHub Actions including **ArgoCD**. Here we have used **Microservices** architecture including multiple API calls and connectivity.
- Deployed applications on **GKE(Kubernetes)** across Dev, Stage, and **Prod** clusters, managing services, deployments, and **Ingress controller** (using **Helm** charts). Set IAM roles, used Cloud storage and **Cloud sql instances**.

Project 4 - AWS - Agentic AI Operations Platform

- Built and deployed the containerized infrastructure for **Agentic AI Operations Platform** which includes **multi-stage Docker** builds for a FastAPI backend and SvelteKit frontend served via Nginx.
- Orchestrated multi-container deployment with Docker Compose, configured ECR image pipelines, health checks, container execution, and **persistent** SQLite DB for state management.
- Delivered **production-ready** deployment for an AI platform supporting multi-model LLM routing (OpenAI, Anthropic, Azure), Slack/Teams, multiple clouds, and webhooks.
- Prepared skill sets for each agents, create connections/integration between Agentic AI Platform and other outside tools.

PERSONAL PROJECTS

WorkTrack Pro – GitOps CI/CD & Kubernetes Orchestration

- Architected and deployed a production-grade microservices application (React, Node.js, PostgreSQL) on Google Kubernetes Engine (GKE).
- Engineered an automated GitOps CI/CD pipeline using GitHub Actions for Docker builds and ArgoCD for continuous cluster synchronization.
- Configured advanced Kubernetes resources including Horizontal Pod Autoscalers (HPA), Persistent Volume Claims (PVC), and Liveness probes for high availability.

Mark42 DevOps Assistant – Agentic AI & RAG Implementation

- Developed a private, AI-powered DevOps assistant utilizing Llama 3.2 and Local RAG architecture to securely query technical documentation.
- Integrated Agentic AI capabilities to streamline routine operations, automate troubleshooting, and enhance productivity.

Web Infrastructure & SEO Management – Cloudflare & DNS

- Built and managed high-traffic web properties (including cyberupdates365.com and udaypatil.com) using AI-driven development tools.
- Integrated Cloudflare for DNS management, SSL provisioning, and security, while independently driving end-to-end SEO optimization.

AWS Infrastructure as Code – Terraform

- Authored and executed Terraform scripts to automate the provisioning of scalable AWS resources, including VPCs, EC2 instances, and RDS databases.

COURSES & CERTIFICATIONS

- Silicon Certified Network Administrator (SCNE)
- Certificate Course in Cyber Security
- Claude 101, Claude Code 101 – Anthropic

EDUCATION

Sarvepalli Radhakrishnan University	Bhopal, India
Bachelor's Degree in Computer Applications(BCA)	2020 – 2022
